Read the passage to answer questions 5-6

The vast multitude of stars are wandering about in space. A few form groups which journey in company, but the majority are solitary travelers. And they travel through a universe so spacious that it is an event of almost unimaginable rarity for a star to come anywhere near to another star. For the most part each voyages in splendid isolation, like a ship on an empty ocean. In a scale model in which the stars are ships, the average ship will be well over a million miles from its nearest neighbor, whence it is easy to understand why a ship seldom finds another within hailing distance.

5. Which of the following is incorrect according to the passage?

- A. Most of the stars travel in isolation
- B. The universe is very large
- C. A star very frequently comes near to another one
- D. A star very rarely comes near to another one
- E. Some stars travel in groups

6. In the passage the "ship" symbolizes:

- A. space
- B. traveler
