Department of Visual Studies, University of Karachi**

The Department of Visual Studies graduates innovative and award winning designers, architects and artists, who are making their mark in the professional world.

The Department of Visual Studies sees itself as a bridge between tradition and innovation. Courses are interdisciplinary and contextualized. A strong theory component alongside practical and professional courses distinguishes the curricula of the Department. A dedicated faculty supported by visiting faculty from professional fields and the university's own pool of excellent scholars, provides training that is current and professional. Students are encouraged to

widen their experience and engage with the larger issues within which they will practice. We live in a rapidly changing world that needs responsible solutions for its many unfolding challenges. With 70% of Pakistan's population below the age of 25, the future lies in the hands of our youth. The graduates of the Department of Visual Studies have the opportunity to influence social perception, the built environment, and determine the cultural legacy of their times. History of ideas, sociology and researched dissertations are some of the ways in which students develop analytical skills, and measure their designs against their social, cultural, economic and

environmental impact. Uniquely placed within Pakistan's largest University, with 52 departments and 20 postgraduate institutes offering a wide range of studies in the sciences and humanities, the students of the Department of Visual Studies are exposed to students and faculty across all academic disciplines.

Future plans include, an evening programme of short courses for professionals wishing to acquire further training. This year we are inaugurating our first postgraduate degree, Design for Social Innovation in collaboration with the Pakistan Innovation Foundation

which will be the first such degree offered in Pakistan.

Degrees offered are:

B Arch (5 years)

BFA (4 years), in one of the following,
Fine Art, Islamic Arts, Art History

B Design (4 years), in one of the following,
Design & Media Arts, Textile Design,
Industrial Design, Ceramics & Glass.

MDSI (2 years)

All specializations begin with one year of Foundation Studies introducing students to a wide range of basic skills.

Subjects introduced in the first year will be drawing, design, draughting, materials & processes and contextual studies.

The objective of these preparatory courses, which are compulsory, is to provide the basic skills and knowledge necessary to engage productively in the subsequent years of training in the chosen specialization.

Architectural Design,
Architectural Research
Urban/Rural Planning,
Interior Design
Historical Site Management
Landscape Architecture

The **Architecture** programme seeks to produce Architects capable of design solutions in the context of social and technical research and innovation. The course consists of Architectural Theory and History, building related Technologies, Service and Materials, Communication Skills and the application of these in Studio Practice. The Program acknowledges the digital revolution, introducing computer-aided design in the second year of the course.

Practical on-site experience and visits to relevant locations, along with their documentation and analysis, are undertaken to help the student understand the issues of the built environment.

A four-month internship program allows the students to gain valuable practical experience leading to a graduating degree project.

Art Criticism
Animation
Illustration
Set Design
Videography
Art Administration
Art Restoration
Gallery Management
Museum Consultancy

The ***Fine Art*** course is an integrated programme that emphasizes concept development and encourages the student to explore creative expression within the contemporary cultural and intellectual discourse. Students are encouraged to use a wide range of media, materials and processes. Drawing is a key discipline. Art history and art theory will supplement concept development.

Traditional disciplines of painting, miniature, sculpture and printmaking are offered along with photography and AV media studies.

Critical analysis and awareness of one's place within regional and international developments prepares students to engage with current art concerns.

Students are expected to present a self-directed body of work that can be interdisciplinary or in one medium of their choice.

Consultancy
Architectural Detailing
Islamic Pattern-making
Crafts Management
Miniature Painting
Book Publishing
Art Research
Restoration
Calligraphy
Ceramics

Islamic Arts has a practical curriculum with a theoretical base exploring surviving Arts and Crafts practices throughout the Islamic World. The underlying philosophy of this programme acknowledges the Islamic Arts as a vibrant subject of great relevance to the Muslim world. These arts need to be revived at a practical level to supplement the theoretical studies and documentation by Muslim and Western scholars. Local and world wide masters of Muslim arts & crafts will be invited to teach the main modes of expression such as architectural detailing, textiles, carpet weaving, ceramics, silver/gold-smithing, metalwork and jewellery, and the 'Arts of the Book' including binding, illumination, gilding and miniature painting.

Artist
Art Critic
Museum Consultant
Researcher
Art Administration
Art Restoration
Gallery Management

The **Art History** programme encourages the students to look critically at the History of Art and Ideas.

Contemporary South Asian art, global art practices, and historical accounts of the developments in art as presented in the Euro-American “Grand Narratives” of art history are studied in depth, but also re-examined through the perspective of cultural studies.

Research is an important component of this course and students are expected to present a substantial researched paper at the end of the course.

History and criticism of art & design and tutorials on related areas of philosophy, literature and the performing arts are incorporated.

This is a theory course; however, students supplement their studies with a studio course of their choice.

**Product Design,
Furniture Design,
TV/Film Set Design,
Transport Systems,
Exhibition Design,
Interior Design,
Signage System Design**

Industrial Design is an inter-disciplinary profession that interfaces between art and technology to conceive design and develop products for the home, the work place and public amenities.

The Industrial Design programme facilitates a wide range of learning experiences including imaginative speculation on design solutions; hands-on practical fabrication, 3D models and computer representation of design ideas; and the articulation of theoretical frameworks for understanding design ideas within a historical and cultural context. Emphasis is placed on social responsibility and the environmental impact of designed products, use of materials and waste management. Evaluating and contemporizing traditional crafted products is an important part of improving standards of living. Individual guidance gives students the flexibility to produce designs for industry as well as small workshop practice.

Print Design
Apparel Design
Interior Design
Craft Management
Fashion Accessories
Set & Costume Design
Display System Design
Home Furnishing & Accessories

The **Textile Design** programme aims to prepare design students for a role in the textile industry, both for clothing and furnishing textiles, accessories and for adding value to traditional crafts. Professional, technical and design skills are developed for a range of printed, woven, knitted and embroidered textile products, and their application for clothing and furnishing. Block and screen-printing, transfer processes, dyeing, knowledge of fabric and weaving on looms are some of the skills taught. Internships and workshops are arranged as an essential part of the curriculum. Students are required to engage in detailed research of traditional and modern textile processes, including visits to craft communities.

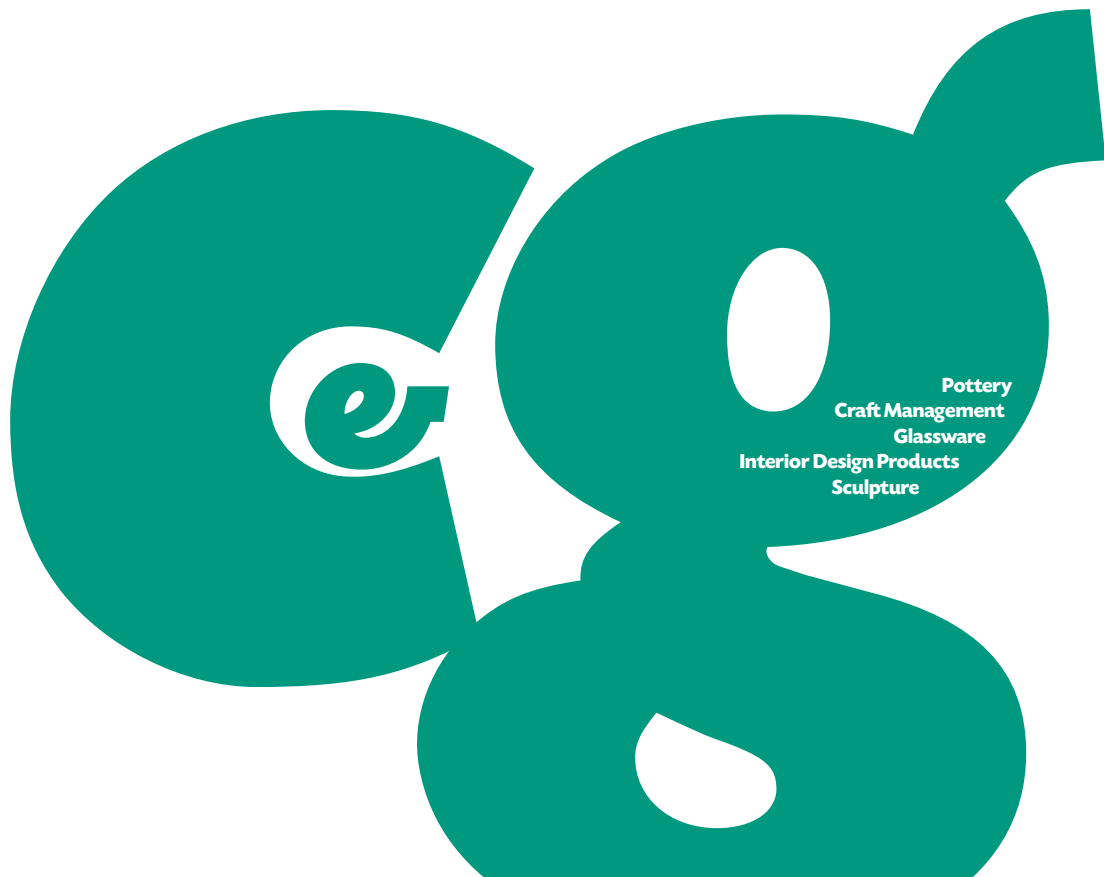

Advertising
Information Graphics
Signage
Editorial Design
Publishing
Exhibition Design
Film & Television Production
Creative Management
Animation
Motion Graphics
Illustration
Photography

Design & Media Arts acknowledges the growing importance of visual communication in business, industry, leisure, broadcasting and cultural exchange.

Students select one of the two pathways: Graphic Design or Media Arts. Graphic Design includes advertising, information graphics, typography, packaging, printmaking, printing-press technology, photography, illustration, computer graphics and editorial design.

Media Arts focuses on Film and Television production including camera, pre/post production, animation, photography, illustration and marketing. Both disciplines take into consideration the multi-cultural and economically polemic markets, critiquing the place of design and media practice in culturally complex societies. Seminars and a strong theory component ensures awareness of cultural issues and responsible practice within existing socio-economic contexts.

Pottery
Craft Management
Glassware
Interior Design Products
Sculpture

The **Ceramics & Glass** programme focuses on studio ceramics and creative glass making.

Students are given hands-on experience of the range of skills and processes, including wheel-throwing, slab and mold building, firing techniques, glazing, glass forming etc.

Emphasis is placed upon experience and training in developing individually produced ceramic and glass works for the designer for workshop practice. Knowledge of the workings of ceramics and glass industry is made available for those intending to establish production workshops.

Masters in Design for Social Innovation: (MDSI)

Social Innovation is an essential component of solving the challenges facing the world today. Pakistan is no exception where social innovation, as a phenomenon, has grown considerably over the years. Much of the inspiration to socially innovate comes from experience of social problems surrounding us and the urge to seek creative and innovate solutions The MDSI at University of Karachi is the first degree in Social Innovation offered in Pakistan, and will be conducted jointly by the University of Karachi and the Pakistan Innovation Foundation. Students will be required to complete 60 credits over two years.

The first year introduces the student to an in depth understanding of social innovation in all its forms and application from international development programmes to individual entrepreneurship. Students will acquire communication skills, mapping and analysis methodologies, science and digital technologies, ethical, cultural and community concerns, and the opportunity to gain hands on experience through study visits to communities and organizations. Lectures from a range of guest speakers from across society will continue across the two years. In the second year the students will develop a thesis with the help of a team of mentors and advisors. It will be in the form of a ready for implementation proposal and will be assessed by a jury of professionals.

Eligibility

The programme will be open to applicants from all fields of undergraduate studies, with a minimum 2.45 GPA or Second Division from a recognized undergraduate programme. . Admission will be awarded after an interview and submission of substantial evidence of work in the social sector.

ASSESSMENT

Student assessment is based on practical assignments given throughout the term and examinations held at the end of each semester. At the end of each semester there is a portfolio assessment. Students are counselled on their overall progress. Home assignments supplement classrooms projects.

GRADING

Passing percentage is 50% in each course. The grades given to the students are expressed as a Numerical Grade (NG), an equivalent Alphabetical Grade (AG) and a Grade Point (GP). Grade Point Ratio (GPR) and a Cumulative Grade Point Ratio (CGPR) will be calculated.

NG	90 – 100	85 – 89	80 – 84	75 – 79	71 – 74	68 – 70	64 – 67	61 – 63	57 – 60	53 – 56	50 – 52
AG	A+	A	A–	B+	B	B–	C+	C	C–	D+	D
GPA	4.0	4.0	3.8	3.4	3.0	2.8	2.4	2.0	1.8	1.4	1.0

Students must pass in 80% of their courses in an academic year, failing which they will have to repeat the year. If a student fails in one course, he or she will be allowed to repeat the course in the following relevant academic session. In each semester students can improve any two previous courses with grade less than 'C' when that course is next offered during their course of studies. Students making a fourth attempt are required to re-attend the relevant class. Architecture student must clear design studio in all years including foundation year in order to be promoted to the next level.

AWARD OF DEGREE

A student must obtain a CGPR of 2.45 in order to be awarded a degree.

ATTENDANCE

A student's attendance must amount to 75%. A student with low attendance will not be allowed to appear for his / her exams.

Students with 60% attendance may pay a fine and appear for the final examination.
