

CURRICULUM VITAE

NAME: Dr. MOHAMMAD JAVED ZAKI

FATHER'S NAME: Mr. Zakaullah (Late)

DESIGNATION Professor

DATE OF BIRTH: December 15, 1955

RELIGION: Islam

NATIONALITY: Pakistani

MARITAL STATUS: Married

ADDRESS:

HOME: House # B-167, Sindh Baloch Housing Society, Gulistan-e-Johar, Block-12, Karachi, Pakistan.

OFFICE: Department of Botany, University of Karachi, Karachi-75270, Pakistan.

QUALIFICATION:

- Post Doc. Rothamsted Experimental Station, UK.
- Ph.D. (Botany, Plant Pathology), University of Karachi
- M.Sc. (Botany, Plant Pathology), University of Karachi
- B.Sc. (Hons) (Botany with Zoology and Chemistry), University of Karachi.

Post Doctoral Research:

- Novel nematocidal compounds produced by nematophagous fungi.

Ph.D. TITLE:

- Studies on Integrated control of *Macrophomina phaseolina* (Tassi) Goid.

FIELD OF SPECIALIZATION:

- Plant Pathology, Nematology, Biocontrol of plant pathogens.

PRESENT POSITION:

- **Professor**, Department of Botany, University of Karachi, Karachi-75270, Pakistan since January 2001.

TRAINING**Foreign**

- Obtained training on Nematocidal compounds produced by nematophagous fungi during working as Rothamsted International Fellow from October 25, 1995 to January 24, 1997 at Rothamsted Experimental Station, Harpenden, Herts, U.K.
- Obtained training on producing and handling of *Verticillium chlamydosporium* and *Pasteuria penetrans*, potential biological control agents for root knot nematodes on crop plants from Rothamsted Experimental Station, Harpenden, Herts, UK, 1996

Local

- Obtained training on diagnosis and control of plant diseases from December 1-10, 1987 at Department of Botany, University of Karachi.
- One week programme of computer orientation organized by Fellows Lions Clubs at the Computer World, Karachi in 1991.
- One day Mushroom Training Programme at Hotel Holiday Inn Crown Plaza, Karachi in 1998.
- A 7 day training course on "Latest development on Molecular Biology and Biotechnology" from 1-7 Oct, 1998, at CEMB and Regional Office UGC, Lahore.

EXPERIENCE:

- **More than 28 years experience (research and teaching).**
- Working as **Chairman**, Department of Botany, University of Karachi since Oct. 1, 2011.
- Working as **Professor**, Department of Botany, University of Karachi since Jan. 2001
- Worked as **Assistant Professor**, Department of Botany, University of Karachi from March 17, 1998 to December 31, 2000.
- Worked as a **Scientific Officer** in the National Nematological Research Centre, University of Karachi from October 9, 1989 to March 16, 1998.
- Worked as a **Research Officer** in a research projects from February 4, 1982 to October 8, 1989 in the Department of Botany, University of Karachi.

HONOUR AND ACHIEVEMENTS:

- Obtained **RI Fellowship** from Rothamsted Experimental Station, Harpenden, Herts, U.K. in 1995.
- Obtained **Productivity Allowance** in 2003, 2011, 2012, on research publications.
- **Managing Editor**, International Journal of Biology and Biotechnology, Karachi, Pakistan since 2004.
- **Associate Editor**, International journal of Biology Research, since 2013

MEMBERSHIP IN SCIENTIFIC SOCIETIES:

- Pakistan Botanical Society (Life member)
- Pakistan Society of Nematologists.
- Pakistan Phytopathological Society (Life member).

- Pakistan Association of Scientists and Sci. Professions (Life member).
- Myco-Phytopathological Society of Pakistan (Life member)

THESIS / PROJECTS

M. PHIL THESIS

Studies on biological control of root knot nematodes of vegetables (Amer-Zareen), 2001

Ph.D. THESIS

01. Use of *Bacillus thuringiensis* in the Integrated Control of Root-Knot nematodes of vegetable crops (M. Qasim Khan), 2012
02. Use of biocontrol agents in seed treatment formulations for the control of *Macrophomina phaseolina* on sunflower (Muhammad Anis), 2012

Ph.D. THESIS Currently supervising

01. Biocontrol potential of *Bacillus* species against root-knot and root-rot diseases of crop plants (M. Waseem Abbasi)
02. Effect of mycorrhizal fungi on plant growth and root rot pathogens of cotton under saline condition (Abdul Rauf)

M. Phil. THESIS Currently supervising

03. Studies on the use of seeds of some indigenous plants for the control of root-knot nematodes (Anum Siddiqui)

M. Sc. THESIS / PROJECTS

01. Antibiotic and antimicrobial activity of fungi (Muhammad Ali), 1999
02. Use of seaweeds in the control of root diseases of okra (Fahmida Kousar), 1999
03. Factors affecting survival of *Verticillium chlamydosporium* *in vitro* and in soil (Asma Noreen), 2000
04. Use of nematophagous fungi in the Biological control of root knot nematode (Faiza Aleem), 2000
05. Characterization of fungicidal and nematicidal isolate (s) of *Pseudomonas* bacterium (Nasima Imam Ali), 2000
06. Studies on chemical control of root knot nematode, *Meloidogyne javanica* (Shaista Javed Kayani), 2001
07. Nematicidal potential of *Rhizobium* species (Aliya Khan), 2001
08. Distribution and host association of root knot nematode in Gulshan Town (Sadaf Shafi), 2004

09. Use of bacteria as biological control agent of root rot and root knot diseases on mashbean and okra (Shazia Perveen), 2004
10. Screening of marine plants for their nematicidal properties against root-knot nematode (*Meloidogyne incognita*) (Zeenat), 2004
11. Effect of halophytes on physio-pathological changes in plants infected with root-knot nematodes (M. Waseem Abbasi), 2005.
12. Effect of seaweeds on the efficacy of bacteria in the control of soil borne root infecting fungi on sunflower (*Helianthus annus* L.) and Mash bean (*Vigna mango* (L.) Hepper) (Sadia), 2006
13. *In vitro* fungicidal and nematicidal activity of spices (Samreen Abbas), 2007
14. Effect of seed dressing in the control of root rot fungi and root knot nematode (Sadia Hayat), 2007
15. Impact of soil texture and microbial antagonists on root rot and root knot nematodes of crop plants (Asma Sikander), 2008
16. Screening of sunflower varieties against *Macrophomina phaseolina* (Tassi) Goid. And *Meloidogyne javanica* (Treub.) Chitwood (Noureen Basheer), 2010.
17. Growth and physiological changes in some plants infected with *Macrophomina phaseolina* (Tassi) Goid. (Sehrish Aleem), 2010.
18. Biological activity of *Citrullus colocynthis* fruits (Kanwal Fatima), 2012.
19. Nematicidal activity of bark of some plants (Rizwana Latif), 2012.

RESEARCH PROJECTS

Project Title	Duration	Funding Agency
1. Biological control of root knot nematode of crop plants	Feb 13,1999 to Feb.12,2001	University Grant Commissio
2. Studies on the nematicidal properties of nematophagus fungi	Feb. 1998 to Feb. 1999	University of Karachi
3. Use of Rhizobia in the Integrated Control of Root Rot Disease of Crop Plants. (As an Acting Principal Investigator)	June 15, 1996 to June 14, 1999	Pakistan Science Foundation
4. The potential of <i>Pasteuria penetrans</i> for the control of root knot nematodes of eggplants	1999-2000	University of Karachi
5. Use of a nematophagous fungus <i>Verticillium chlamydosporium</i> in the control of root knot nematodes on eggplant	2000-2001	University of Karachi

6. Use of Rhizobia in the Biological Control of Root knot Disease of Crop Plants.	May 1, 2001 to April 30, 2004	Pakistan Science Foundation
7. The potential of <i>Pseudomonas</i> species for the control of root-knot nematodes	2002-2003	University of Karachi
8. Chemical control of root knot nematode, <i>Meloidogyne incognita</i>	2003-2204	University of Karachi
9. Screening of Halophytes against root knot nematodes (<i>Meloidogyne</i> spp.)	2004-2005	University of Karachi
10. Screening of some Halophytes against Root infecting fungi	2006-2007	University of Karachi
11. Characterization of nematocidal <i>Bacillus thuringiensis</i> and its application for the Control of root knot nematodes in vegetable crops	2006-2009	Higher Edu. Commission
12. Patho-physiological changes in plants infected With root knot nematodes	2007-2008	University of Karachi
13. Biocontrol potential of some <i>Bacillus</i> species Against root knot nematode	2009-2010	University of Karachi
14. Talc based bio-formulations of <i>Trichoderma</i> species for management of sunflower charcoal rot caused by <i>Macrophomina phaseolina</i> (Tassi) Goid.	2011-2012	University of Karachi
15. Studies on the effect of <i>Bacillus</i> species on plant growth and biochemical alterations in nematode infected plants	2012-2013	University of Karachi

RESEARCH PUBLICATIONS

A. RESEARCH PAPERS

1. **Zaki, M. J.** & A. Ghaffar (1987). Effect of *Rhizobium* spp. on *Macrophomina phaseolina*. *Pak. J. Sc. Ind. Res.*, 30: 305-306.
2. **Zaki, M. J.** & A. Ghaffar (1988). Inactivation of sclerotia of *Macrophomina phaseolina* under paddy cultivation. *Pak. J. Bot.*, 20: 245-250.
3. **Zaki, M. J.** & A. Ghaffar (1989). Effect of soil solarization on the reduction in viability of sclerotia of *Macrophomina phaseolina* at different field locations. *Pak. J. Sc. Ind. Res.*, 32: 413-415.

4. Ehteshamul-Haque, S., A. Ghaffar & **M.J. Zaki** (1990). Biological control of root-rot diseases of okra, sunflower, soybean and mungbean. *Pak. J. Bot.*, 22: 121-125.
5. Maqbool, M.A. & **M.J. Zaki** (1990). Occurrence of *Pasteuria penetrans* on mature females of *Meloidogyne javanica* and *Meloidogyne incognita*, root-knot nematodes in Pakistan. *Pak. J. Nematol.*, 8: 13-15.
